Site Access and Delivery

Sheds, Pool Houses, and Gazebos

Constructed with the classic craftsmanship that Grey's is known for, our beautiful sheds and pool houses come in a variety of styles, sizes, and colors. We will help you design a shed to match your surroundings and meet your needs. Select from our wide variety of siding options and arrange doors and windows to your liking. All of our sheds and pool houses are handcrafted in modern workshops.

Not only does a shed or pool house from Grey's Woodworks provide much needed storage space for your mower, snow blower, or bike – it is also an attractive addition to your property as well. Grey's Woodworks is fully insured and we have the necessary building plans to help you through the building permit process. At Grey's Woodworks, our buildings are delivered fully assembled with an option to build on site.

Using a lightweight machine called a Mule, we're able to deliver your shed into tight spots and challenging sites with ease, plus save your lawn from the full weight of a truck. With no additional cost, it's the top-of-the-line service you need in order to deliver your beautiful, fully assembled shed!

For locations with limited access, Grey's Woodworks offers a build-on-site option. The price for this option for sheds, pool houses, and gazebos is an additional 20% of the base retail price of the building. Grey's Woodworks reserves the right to up charge a customer based upon the desired location and accessibility of the shed site above and beyond the normal pricing due to extraordinary situations.

Site Preparation

Sheds, Pool Houses, and Gazebos

Level Gravel Pad without Ties **\$9 per sq. ft.**

Level Pad with Pressure-Treated Ties **\$17 per sq. ft.**

Site work pricing is applied to sites that are within 8" of being level. Greater differences are at an increased cost.

PURCHASER'S RESPONSIBILITY

1. Please have I0 to I6 (2" thick) concrete patio blocks for Grey's crew to use for leveling purposes if building is not going on a gravel pad.
2. In order to deliver a fully assembled building, we require a minimum height clearance of 14' and a minimum width clearance of 2' – 4' wider than the building being delivered. Be aware of overhead wires, tree branches, and existing overhangs.
3. If the site is more than 6" out of level, it needs to be leveled by purchaser with a level gravel pad, or by Grey's Woodworks at additional cost.

*EXCAVATION, CONCRETE BLOCKS, AND BUILDING PERMITS (WHERE APPLICABLE)
ARE THE PURCHASER'S RESPONSIBILITY.

OPTIONAL SITE PREPARATION SERVICE AVAILABLE BY GREY'S WOODWORKS:

Gravel pads ensure that your new building will have optimal floor support,
good perimeter drainage, and a cleaner appearance with increased lifespan.

GAZEBOS:

Every custom-built gazebo is designed to give you many years of enjoyment.

- Handcrafted from CA Natural Select (Arsenic-Free) pressure-treated southern yellow pine for maximum strength and long life.
- Kiln-drying both before and after pressure-treating makes painting or clear wood finish application possible immediately.
- #1 24" cedar shakes provide lasting beauty and protection.
- Each board is planed and shaped for smooth surfaces and finished edges.

- Stainless steel screws in weather-exposed areas provide maximum durability.

- Parquet-type floor on every octagon or oval gazebo.
- Cedar-shingled cupola included as shown.

STANDARD ROOF:

- Pressure-treated T&G underlay with 30-year architectural shingles and cupola.

Engineered drawings and floor plans are available for building permit purposes.

STRUCTURAL POSTS:

We fabricate special structural components by creating a vinyl sleeve to cover the treated lumber support posts. The treated lumber is never exposed to the elements. The vinyl sleeve means no splinters and no maintenance.

HIGH QUALITY VINYL:

Vinyl has been used in construction for a long time, especially in structures such as fences. But there is a big difference in the quality of vinyl used for outdoor applications. We use only vinyl with the highest grade ingredients and added thickness for extended service life and attractive appearance. Select from White, Ivory or Clay.

CEILING:

Engineered drawings and floor plans are available for building permit purposes. We call the boards that form the ceiling and roof deck "underlay." The underlay consists of tongue and groove boards to make construction as durable as it is beautiful.

STANDARD ROOF:

Pressure-treated T&G underlay with 30-year architectural shingles.

Garages

Constructed with the classic craftsmanship that Grey's is known for, our beautiful garages come in a variety of styles and sizes. We'll help you design a garage to match your surroundings and meet your needs. Select from our fine Duratemp T1-11, Vinyl, LP lap or board and batten sidings and arrange the doors and windows to complement your unique design. All our garages are hand-crafted in our modern workshop. From our one story classic garage to our variety of two-story building options using either rafter or truss construction, we offer stunning design options and the finest workmanship.

Site Preparation for Garages

Grey's Woodworks handles all garage site preparation and masonry work. Prices are included in the following building prices for either a monolithic slab on grade or a 4' poured frost-wall foundation for sites up to 12" out of level.

A Letter from Owners Beth and Bob Mickelson:

In 1979, our founder Bob Grey was asked by a neighbor to build a utility shed. A carpenter by trade with a passion for woodwork, Bob built a custom barn-style shed with craftsmanship so impressive that it caught the attention of many passers-by. As a result, requests began pouring in from people who wanted Bob to build them their own custom shed.

From those humble beginnings, Grey's Woodworks has grown into a family-run business that provides a complete line of handcrafted sheds, gazebos, garages and outdoor accessories. A lot has changed since Bob Grey started the company in 1979, but one element has remained throughout our years in business: *our commitment to customer service and quality craftsmanship.*

Our company has a reputation for outstanding work and attention to detail, and our products are built with you in mind. All building components are designed and hand-built with premium-grade materials to ensure that you are getting an exceptional product, and we offer a wide variety of sheds and garages to assure that every detail meets your needs.

The Grey's family takes great pride in our products. We look forward to working with you and pledge to provide you with only the best quality and service.

Sincerely,

Beth and Bob Mickelson
