Weaver Barns *ltd.*
"everyone needs a little structure in their life"

**BUILD
YOUR
DREAM SPACE**

www.weaverbarns.com

Welcome

Since 1994 Weaver Barns has been building two things—structures and a reputation for unmatched quality. We strive to provide the best in everything we do, from customer service to manufacturing to installation. Quite simply, we provide you an excellent product that you and your family will enjoy for many years to come.

Structure Matters

Quality is something that we strive for, which is why we use the best materials on the market. From our premium grade flooring to our engineered ventilation system, we take time to ensure that our structures are built the correct way. Not only do we use superior materials, but we also offer a variety of choices, so you don't have to compromise your structure's quality or appearance.

Designing Your Perfect Space

Here at Weaver Barns, we make it our mission to help you find a space that will best fit your needs. Our customizable models set us apart because it allows us to make quality structures that will fit perfectly in any space. Each one of our products goes through a meticulous and thorough design process, where we take the time to integrate our customers' feedback into each of our designs. Once you are interested in our product, one of our team members will sit down with you to discuss which design will work best for your situation. From there, they can help guide you into customizing your dream structure.

Design Styles

To find a style that best fits your standards, we have a large variety of features for you to choose from. These styles are all unique and customizable, so you can find one that fits best into your space. Unlike other brands, our designs are not only based on appearance, but also on their functionality and durability. If you aren't sure what style will work best for your structure, our team is always eager to help guide you by giving recommendations specific to you and what you're looking for.

The Importance Of Shelter

By definition, a shelter is a place where you can find protection. It should also be reliable and long-lasting, which is what we focus on here at Weaver Barns. When building your structure, we take the time to make sure that every step of the designing and building processes are done with the most precision and accuracy. Not only are our structures built to be reliable, but they are also built to look great and add a unique element to your home.

What Size Is Right

When determining what size is right for your structure, we encourage you to talk to one of our qualified team members to figure out what works best for you. There are a lot of decisions that go into creating a structure, and we want to make that process as easy as possible for you, whether it's a custom home or even a shed.

Siding Choices

Siding is extremely important when building and customizing your project. It not only adds a personalized element to your structure, but it also provides protection to the outside of your barn protecting it from the elements. With six different siding choices, we give you the flexibility to choose what you want for your structure without overwhelming you with too many options. All of our siding choices have different and unique benefits so you can pick which one is best suited for your needs. Any one of our siding options would be a great choice to add to your structure.

CUSTOMIZED

you dream it **WE BUILD IT**

It is our pleasure to build the structure you have always wanted. We have built our business on the idea that every structure we build, is built the way the customer wants it. From a basic shed to a fully custom designed structure, to fully customizing any of our models with the options, accessories and layout you want. We will help create your dreamscape. At Weaver Barns, we do it your way.

QUALITY

A No Compromise Approach

At Weaver Barns, our culture is quality. Every aspect of the projects we do is done right. We care about building something that will last. We understand that our customers need a space that will stand the test of time. From custom milling our floor boards to buying premium grade lumber, to using the finest materials we can source, we do not just build a shed, we build the Weaver way.

FOUNDATION CHOICES

BLOCK SITE PREP

**Not Recommended For Grades Exceeding 8"*

Place 8" x 16" x 4" cement blocks underneath the skids. Every skid needs a block at the front and back and then additional blocks need to be placed in the middle spaced not more than 6' apart.

LIMESTONE PAD

**The Most Popular Choice For Sheds*

Spread 4" of #57 limestone in a level pad 12" beyond the width and the length of the building on all sides. Also, you may want to use a 4 x 4 as an edge as shown in the example below.

CONCRETE FOUNDATIONS

Pour the pad 1/2" less than the dimensions of the building. We attached treated plates to the bottom of the walls protecting the walls from moisture and rot. These bottom plates are fastened to the concrete pad with anchors or bolts.

POST PLATFORM FOUNDATION

Use treated posts. Dig the post holes 32" - 42" deep. Place post pad or concrete in the bottom of the hole. Insert posts. Fasten cross beam joists with bolts to posts as shown making sure that the entire structure is square.

Choosing The Right Siding

Choosing which siding is the best option for your barn is extremely important. Although any one of our siding choices would be an excellent choice, they all present different and unique benefits. Whether you are more concerned for your barn's color and aesthetic or for its durability, we have an option for you. If you are still looking for more options, we do offer non-standard alternative options.

SHED TO CABIN

Did you know that you can turn any of our sheds into a perfect little cabin?

Pictured here is a 12x24 Gable shed. The Gable is our most popular shed, but you can easily convert the Gable shed into a Cabin. If you have a few acres and want an affordable space to rest in, this may be a good fit. Adding insulated windows and doors helps to better deal with temperature fluctuations. Many customers also insulate and finish the interior of the shed by themselves, using wood or metal products.

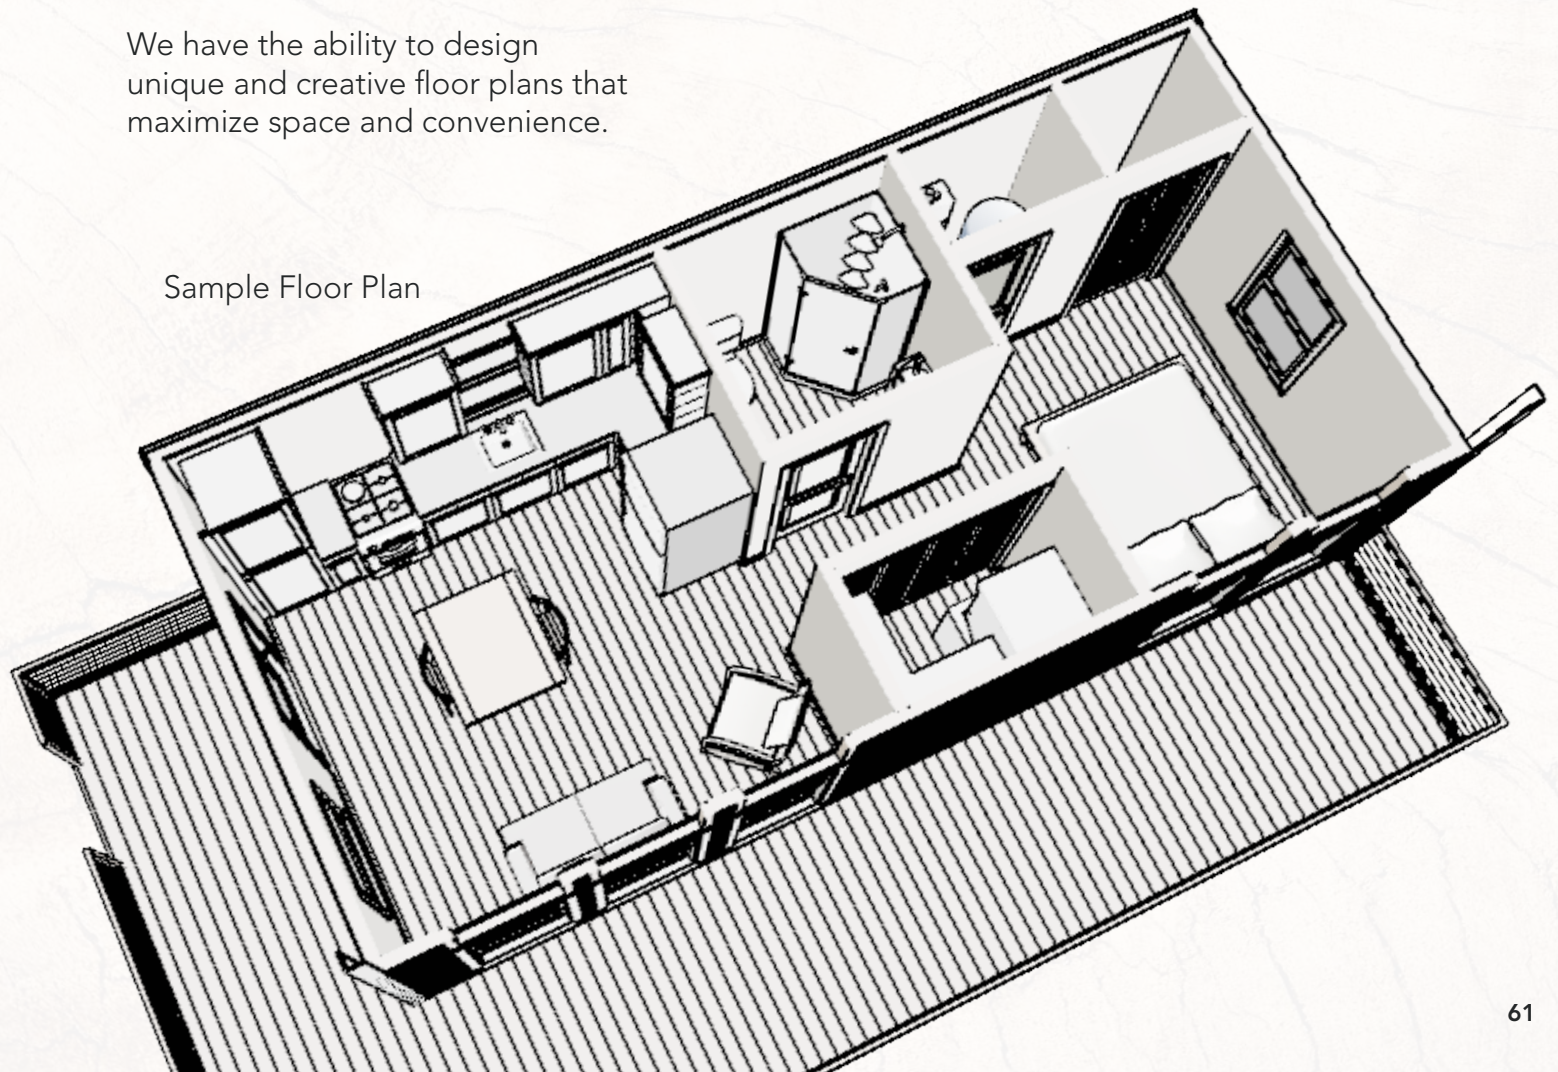

An Illustration of a
Studio 14x30 Cabin

We have the ability to design
unique and creative floor plans that
maximize space and convenience.

Sample Floor Plan

Cumberland CABIN

Classic cabin design and a very functional gambrel roof style make the CUMBERLAND a wonderful structure. With a front porch and half loft included you get the perfect Cabin for a break from your wonderful outdoor adventures.

Aspen CABIN

Imagine yourself looking out across a beautiful lake setting or a majestic mountain vista. We all love these moments and what a better way to enjoy them then with an ASPEN CABIN. With its one level floor plan, and open spaces it feels open and airy. Big windows allows lots of natural light and views of the surrounding landscape.
